Counseling

The Sierra Vista counseling staff plays an important role on campus. The team guides the students throughout all four years of high school while implementing the academic requirements.

The counseling staff ensures the following are available to every student and their parents:

- A) Identification of students' academic, personal, college and career skills and needs.
- B) Referrals to appropriate school support staff, alternative programs and community resources.
- C) Continuous guidance in planning students' post high school education and careers.
